

“One Call Solves All For Total Property Care”

SUMMER VIBES!!!

June and July have brought us the sun and Summer has arrived— AT LAST!

Finally our team on site can enjoy some sun whilst working outside (the office staff are just a little jealous). We are currently working on a rear first floor house extension project and we were asked to plan and design an open plan bedroom and bathroom.

As you can see in the picture the extension is coming along nicely and our carpenter Dan is hard at work—we can not wait to see the end result.

Also, we are currently carrying out flooring works for one of our industrial clients, a food manufacturer in Abertillery and took a sneak

peek at a Product Development Kitchen that we completed back in 2014. We were happy to see that the kitchen is in full working order and still looks brand new. **Well Done Kelray!**

As schools close for the Summer holidays we are getting ready to start refurbishment works in a number of local schools and look forward to what they have in store for us.

Construction News...

Swansea Bay in South Wales has been granted planning permission to be the home of the world's first tidal lagoon power plant.

Kelray sign up to the Defence Employer Recognition Scheme...

Our Managing Director, Carl Raynes was invited to attend the Armed Forces Employability Pathway Event that was organised to encourage construction companies to sign up to the 'Defence Employer Recognition Scheme'. The scheme aims to support employability for the Armed Forces community. Here's the full write-up: <http://tinyurl.com/pahdg85>
